Re: Magnablend Fire in Ellis County in October of 2011

To Whom It May Concern:

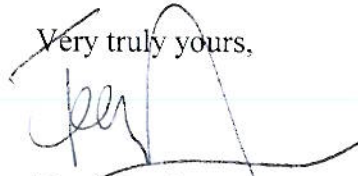

I need to obtain information with respect to the Magnablend fire that occurred in Waxahachie in October of 2011, and any tests, reports or analyses that were done by the EPA (or anybody else) regarding the fire, contaminants that may have migrated during or after the fire and other similar matters. The Magnablend fire was located at 1601 W. Highway 287 Bypass, Waxahachie, Texas 75165. Specifically, I request the following documents:

1. Copies of all studies, test results, analyses, and reports with respect to the release or potential release of chemicals at that site and on adjacent properties, including Navarro College.
2. Copies of any documents that show the presence (or absence) of chemicals on the Navarro College property adjacent to the Magnablend facility in Waxahachie, Ellis County, Texas.
3. Copies of any reports or summaries detailing the conclusions of the EPA, or others, with respect to the presence (or absence) of chemicals on the Magnablend property or the adjacent Navarro College property.
4. The results of water, air and soil samples conducted by or on behalf of the EPA in connection with its investigation of the Magnablend fire and release of chemicals on or after October of 2011.

The time period of this request is 2011-2013.

Very truly yours,

Terry Jacobson
